Available for Remote Work | Graduating August 2027 | Open to Relocation Thereafter

SUMMARY

Computer Science student (graduating August 2027) and MERN stack developer with hands-on experience building full-stack web applications, including a music-streaming platform and a social media app currently in development. Currently interning as a full-stack developer, working with Node.js, Express, MongoDB, and React on live company projects, alongside a foundation in machine learning and AI concepts. Seeking a remote backend/full-stack development role to contribute while completing my studies, with the goal of relocating for an on-site position after graduation.

SKILLS

- **Languages:** JavaScript, C++
- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful APIs, PHP (basic)
- **Databases:** MongoDB, MySQL (basic)
- **Tools & Concepts:** Git, GitHub, VS Code, Postman, Data Structures, OOP, Networking (VLANs, Routing, ACLs)
- **Emerging Skills:** Machine Learning, Artificial Intelligence

EXPERIENCE

Full-Stack Developer Intern (MERN Stack) — Techling Company, Sheikhpura

2025 – Present

- Transitioned from frontend-focused work into full-stack development, learning and applying the MERN stack (MongoDB, Express.js, React, Node.js) on live company projects.
- Built and tested RESTful API endpoints with Node.js and Express, connecting React front-end interfaces to backend services.
- Integrated MongoDB for data storage and retrieval, including schema design and query writing for company projects.
- Performed testing on an internal company project to identify and resolve bugs ahead of deployment.
- Applied Material Design principles to build responsive, user-friendly UI components in React.

PROJECTS

Sonata — Music Streaming Platform (MERN Stack)

- Built a full-stack music platform where artists can publish albums and tracks, and listeners can browse and stream music, using React on the frontend and Node.js, Express, and MongoDB on the backend.
- Implemented separate artist and listener roles with role-based views and permissions.
- Designed RESTful APIs and MongoDB schemas to handle album/track uploads, metadata, and playback.

Social Media App (MERN Stack) — In Progress

- Developing a full-stack social media application using React, Node.js, Express, and MongoDB.
- Implemented text-post creation and feed functionality; currently building image and video posting features.
- Designing backend schemas and APIs to support multimedia content handling.

GeoCrop AI (AI-Based Project)

- Built an AI-based solution for crop-related prediction and analysis, applying machine learning concepts and data handling.

Portfolio Website

- Built a responsive personal portfolio with React and CSS to showcase projects and skills.

Additional Practice Projects: Currency Converter, Calculator App, Rock-Paper-Scissors, and Number Guessing Game — smaller JavaScript/React projects for practicing core logic and API integration.

CERTIFICATIONS

- Meta — Programming with JavaScript, Coursera
- Meta — Operating System, Coursera

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Expected Aug 2027

University of Management and Technology (UMT), Lahore

LANGUAGES

English (Fluent) | Urdu (Native) | Punjabi (Intermediate) | German (Beginner)
